EDUCATION

Texas A&M University (TAMU)

December 2024

M.S. in Electrical and Computer Engineering

GPA: 3.8/4.0

Related courses: Pattern Recognition, Machine Learning, Digital Image Processing, Linear Algebra, Computational Photography, Parallel Computing, Analysis of Algorithms

Bangalore Institute of Technology

May 2021

B.E. in Electronics and Communication

GPA: 9.15/10

Related courses: Digital Image Processing, Signal Processing, Probability, Statistics, Operating System

RESEARCH INTERESTS

My interests lie in developing innovative computer vision and machine learning algorithms for analyzing complex medical data, with the ultimate aim of developing clinically translatable tools that enhance diagnostic accuracy, personalize treatment strategies, and improve patient outcomes across diverse healthcare domains.

RESEARCH EXPERIENCE

Texture Analysis of Lung Cell Morphology after Nanoparticle Exposure (Under review for SPIE: Medical Imaging)

May 2024 - Present

Supervisors: Dr. Joshua Peeples, Prof. Christie Sayes

TAMU

- Analysis of finding a significant relationship between morphological imaging metrics like lacunarity and fractal dimension and sensitization of dendritic cells over nanoparticle exposure.
- Quantifying and analyzing differences in cellular texture using Earth's Movers Distance.

Master's Thesis: Lacunarity Pooling Layers for Plant Image Classification using Texture Analysis [1]

August 2023 - April 2024

Supervisors: Dr. Joshua Peeples

TAMU

- Introduced a novel pooling technique to improve image classification by leveraging texture information.
- The pooling layer captures the spatial heterogeneity of feature maps by examining variability within local windows at multiple scales.
- Demonstrated resilience in research by overcoming significant challenges, including a potential shift in research direction. Persevered with the original concept, leading to successful completion and publication.
- Refined scientific writing and communication skills through the iterative process of thesis writing and publication preparation.

Quantitative Analysis of Explainable Artificial Intelligence Methods for multi-spectral image classification [2]

January 2023 - June 2023

Supervisors: Dr. Joshua Peeples

TAMU

- Conducted a comprehensive analysis of XAI methods for improving interpretability in multi-spectral image applications.

Spatial Transformer Network YOLO Model for Object Detection [3]

Supervisors: Dr. Joshua Peeples

January 2023 - June 2024

TAMU

- Proposed an innovative integration of Spatial Transformer Networks (STNs) with the YOLO object detection model to address challenges in cluttered and partially occluded images.
- Developed an innovative image preprocessing technique for multi-spectral images, involving band superimposition and min-max normalization.
- This novel approach significantly enhanced spatial resolution and implemented effective denoising, resulting in improved signal-to-noise ratio (SNR).

Generation of Netlist from a Hand-Drawn Circuit through Image Processing and Machine Learning [4]

Supervisors: Dr. Narendra C P

January 2021 - May 2021

BIT

- Developed an innovative approach to convert hand-drawn circuits into netlists using image processing and machine learning techniques.

TEACHING EXPERIENCE

Texas A&M Electrical and Computer Engineering Department

August 2023 - May 2024

Course: ECEN 214: Electrical Circuit Theory

TAMU

- Led ECEN 214 Electrical Circuit Theory lab sessions, supervising three sections per semester with 70+ undergrad students.
- Administered exams, assessed student reports, and taught fundamental topics including electronic components and measurement tools.

INDUSTRY EXPERIENCE

Android Security Software Engineer

August 2021 - July 2022

Ittiam Systems Pvt. Ltd.

Bangalore, India

- Developed software fuzzers for Android's Open-Source Project, focusing on Linux kernel and UI test automation, resulting in more than 80% code coverage and enhancing overall platform security.
- Engineered C++ code for LLVM and syzkaller backend, successfully debugging and improving AOSP platform security.

Video Processing Research Intern

Indian Institute of Science (IISc)

May 2021 - August 2021

Bangalore, India

- Pivoted research direction following a key discovery in the H.264 buffer model.
- Enhanced H.264 rate control for adaptive video quality: Implemented and optimized H.264 rate control methods using FFMPEG on Linux.
- Network performance optimization for real-time streaming: Utilized UDP over Wi-Fi for low-latency transmission.

Computer Vision Research Intern

EngineCAL Pvt. Ltd.

June 2020 - September 2020

Bangalore, India

- Developed a real-time Machine Vision driver assistance leveraging AI for monitoring lanes and vehicles on road including automotive object detection in autonomous vehicles. Implemented real-time alerts via a Telegram bot in a robotic system.
- Configured and optimized Raspberry Pi and NVIDIA Jetson Nano GPU camera modules for efficient object recognition tasks and data processing.
- Executed the training and deployment of the MobileNet-SSD v2 algorithm on edge devices, achieving an a 72.7% mean average precision (MAP).

COURSE PROJECTS

Medical Chatbot: LLM and Vector Embedding-Based Medical QA System

Large Language Models

Engineered a FastAPI application leveraging transformer-based foundation models i.e., LLMs and Retrieval-Augmented Generation (RAG) in LangChain enabling precise medical question-answering and optimized user experience.

Convolutional Neural Networks for Reversing Artistic Image Filters

Computational Photography

Improved image restoration for photographs modified with 22 photographic filters, enhancing visual quality, achieving a minimum loss value leading to a peak signal-to-noise ratio (PSNR) increase of 0.0035.

Facial Recognition using the Viola-Jones Algorithm

Pattern Recognition

Engineered training of a face classifier using the AdaBoost algorithm on a diverse dataset of 2000 face and 1470 non-face images, employing effective preprocessing techniques to enhance model performance.

POSITIONS OF RESPONSIBILITY

Editor at Indian Student Association

January 2023 - December 2023

- Designed and marketed events and increased the online outreach on the IGSA Facebook page by 34%.

President at Electronics and Communication Student Association August 2020 - May 2021

- Managed a 16 member team responsible for execution of workshops and events in the ECE department.

SKILLS/HOBBIES

Programming Languages

C, C++, Python, R, SQL, CUDA, Linux, Unix

Machine Learning Tools

PyTorch, TensorFlow, scikit-learn, pandas, NumPy, PowerBI, Tableau, LangChain

Cloud Technologies

AWS Sagemaker, AWS Bedrock, AWS S3, AWS EC2, AWS Athena, Azure Data Factory, Azure AI Fundamentals (Certified)

Hobbies

Sketching and Writing
